LTS Secure

vSOCBox

AI-ML powered virtual cyber security platform for SOC
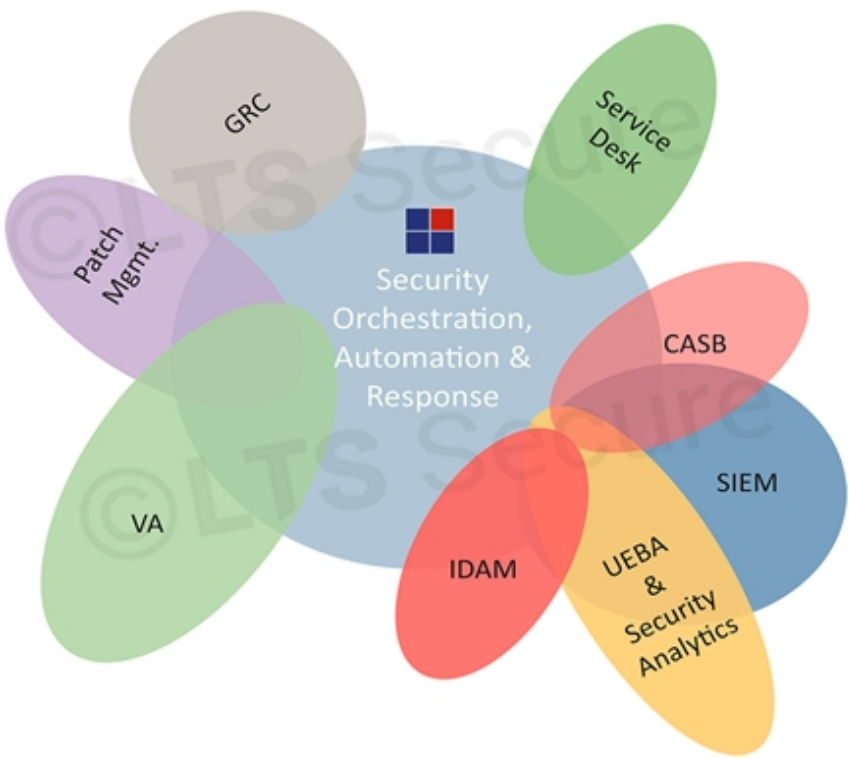

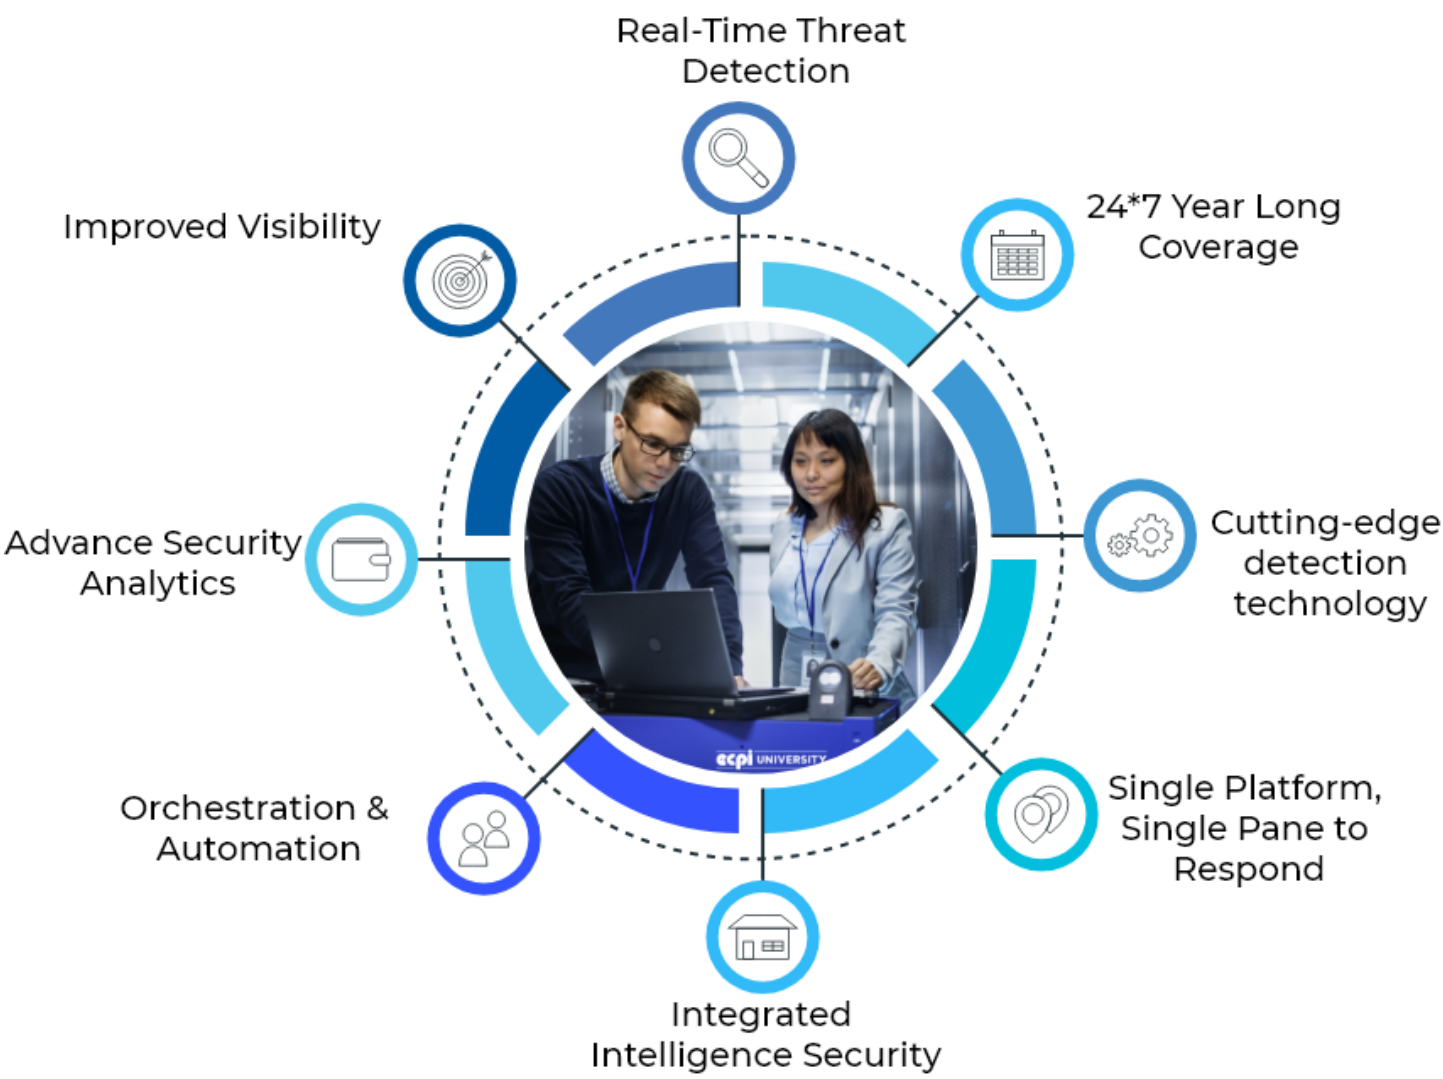

Detect, Prioritize, & Automate Response to Real Threats across Complete Cyber Infrastructure.

AI-ML powered virtual cyber security platform for SOC "vSOCBox"

LTS Secure's vSOCBox is an integrated context-aware security protection platform that provides and integrates prediction, prevention, detection, and response capabilities by leveraging adaptive security framework. The intelligence driven vSOCBox is an integrated SOC platform for real-time threat detection across cyber infrastructure which includes network, applications, users and IoT devices.

## Features Of LTS Secure's vSOCBox to Protect Your Business

Real-Time Threat Detection

24*7 Year Long Coverage

Improved Visibility

Advance Security Analytics

Cutting-edge detection technology

Orchestration & Automation

Single Platform, Single Pane to Respond

Integrated Intelligence Security

vSOCBox Platform Capabilities

GRC

Service Desk

Patch Mgnt.

Security Orchestration, Automation & Response

CASB

SIEM

VA

IDAM

UEBA & Security Analytics

Detect
Detect threats from all IT Layer

Prioritize
Centralize Alarms and Priorities response based on Risk

Automate
Automate response with enriched mitigation

LTS Secure

The Essentials of the Platform

The LTS Secure vSOCBox platform delivers unlimited scale, powered by advanced analytics, behavior detection, threat modeling, and machine learning.

LTS Secure vSOCBox
AI-ML Powered SOC Automation Redefined

SIEM + UEBA	IDAM + PIM	CASB	SOAR
Monitoring, incident response, log management, ..	To control user access to critical data with the role-	Safely enabling cloud services for people and enterprises	Tools to intelligently automate security ..

The Essentials of the LTS Secure Platform

How vSOCBox can be Deployed?

Our vSOC service acts as an extension of your in-house IT team to provide 24/7 threat detection and response at a fraction of the cost of equivalent in-house investment. Following are two sub options for deploying a SOC within your organization:

vSOCBox

It Is An Enterprise-Run SOC That Is Fully Controlled By Enterprise But Hosted In The Cloud Without The Overhead Of A Physical Location.

- ML based single pane security analytical platform
- Single View for unknown threats visibility for network, users & application for business continuity.
- Reduced response time by AI based prioritization of alarms with asset & business context.
- Better ROI with AI based security operations management (SOM) life cycle.
- Real-time detection based on threat intelligence & risk scoring.

- SOC 2 and ISO certified Geographical Redundancy built in with operations in USA and INDIA.
- 24x7x365 Security Operations Coverage
- Staff includes Security L1 & L2 analysts, engineers, and management
- Working together in accomplishing our Security Objectives and Deliverables.
- Mature processes & controls based on industry accepted frameworks (NIST Cybersecurity, ITIL Service Management & GAMP)
- Team of Senior Threat Hunting Team and Resources with in-depth knowledge of security, compliance and operations.
- Clear documentation of the categories, events, process, escalation, and expectation of the service before the engagement is started with continuous improvements.

vSOCBox-As-A-Service

A Subscription-Based Virtual SOC(Socaas), Is When Enterprises Outsource Some Or All SOC Responsibilities To A Managed Service Provider.

LTS Secure

How Has vSOCBox Helped Businesses?

10X
Productivity Gain

91%
Improvement in Operational Efficiency

90%
Reduction in Alerts into SOAR
