**Manage - Extend, Detect, Respond**

www.ltssecure.com

Enhanced Cybersecurity with Managed XDR

In today's digital landscape, cyber threats are constantly evolving, putting your organization's sensitive data and operations at risk.
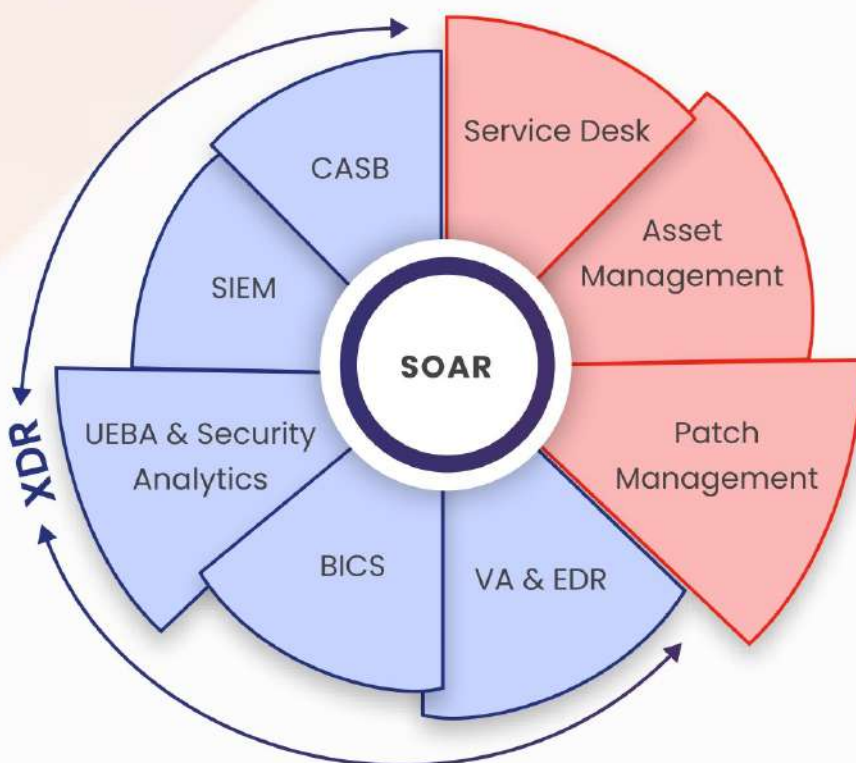

Stay one step ahead with Managed Extended Detection and Response (M-XDR) services

M-XDR is a robust defence mechanisms that cover all your cybersecurity concerns

Enterprise Concerns:
- AI to recognize good and evil
- Skill & Staff gaps
- Slashed budgets
- Extending to IT/OT
- Compliance & DOT on security tool

vSOCBox™ M-XDR
(Platform as a service)

vSOCBox ™ M-XDR suite is a Managed XDR platform which delivers SIEM, EDR, VMDR, BICS & SOAR as a on demand module from a single suite where it can detect, extend threats and automate your patch management, Asset management & Service desk

XDR / SOAR wheel:
- Service Desk
- Asset Management
- Patch Management
- VA & EDR
- BICS
- UEBA & Security Analytics
- SIEM
- CASB

Detect
Detect extended threats from all IT/OT layers, End points, cloud platforms & IoT.
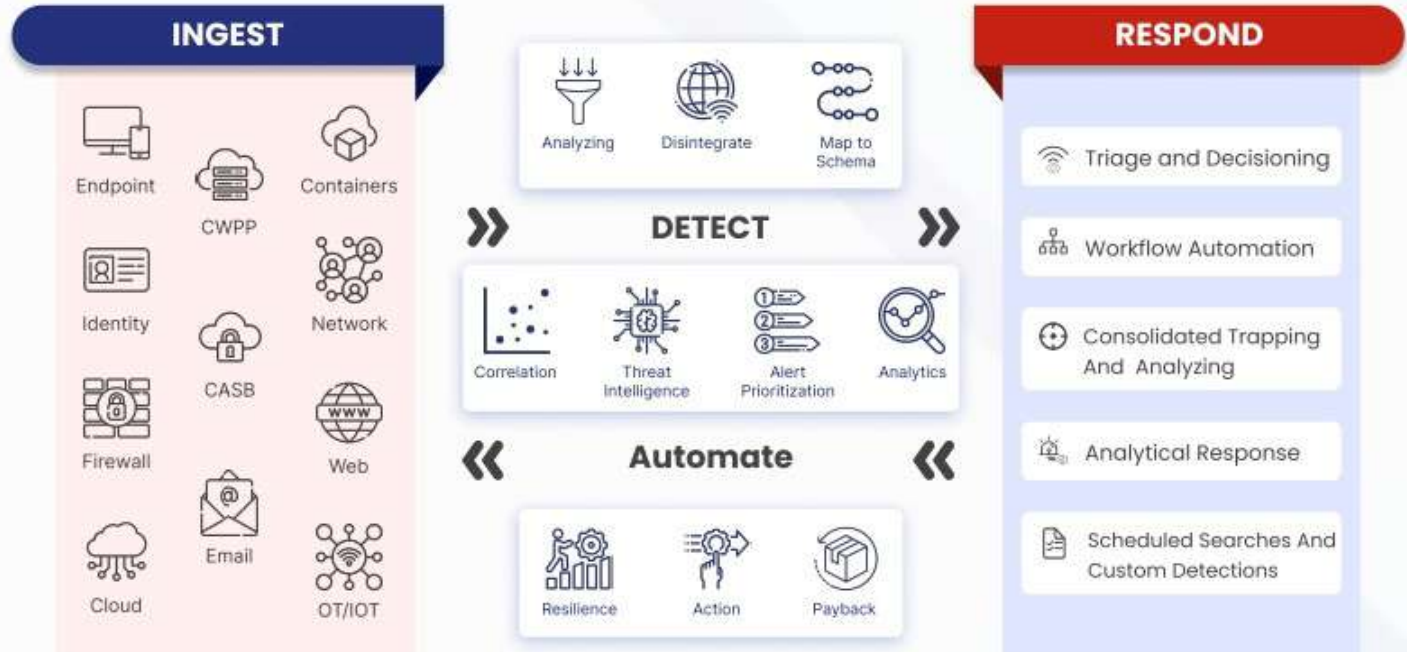

Prioritize
Centralize alarms & Prioritize response based on risk impact on a asset value.

Automate
Automate response with enriched mitigation to protect realtime

LTS Secure's M-XDR Protection

LTS Secure's AI/ML based M-XDR cybersecurity platform capabilities enables you to complete your security and business objectives

INGEST

- Endpoint
- CWPP
- Containers
- Identity
- Network
- CASB
- Firewall
- Web
- Cloud
- Email
- OT/IOT

- Analyzing
- Disintegrate
- Map to Schema

DETECT

- Correlation
- Threat Intelligence
- Alert Prioritization
- Analytics

Automate

- Resilience
- Action
- Payback

RESPOND

- Triage and Decisioning
- Workflow Automation
- Consolidated Trapping And Analyzing
- Analytical Response
- Scheduled Searches And Custom Detections

LTS Secure's vSOCBox M-XDR USP

- Reduce ~ 50% cost on existing cyber security solution
- SIEM, EDR, VMDR, BICS & SOAR in single suite
- Simple licensing model
- Ownership to manage
- No hassle to upgrade and support
- Cover your end point, cloud, IT/OT & IoT
- Protection and automation in single tool
- Advance threat intelligence

LTS Secure Promise

LTS Secure protection provides protection across landscape i.e. IT/OT with our advance threat intelligence and AI/ML based detection and remediation

LTS Secure Delivery

A single platform works seamlessly to deliver technology, process & resources consistently

LTS Secure Value

Affordable Security with quick deployments, flexible use cases & no integrations, a scalable, modular platform adapting to your security roadmap without complexity.

About **LTS Secure**

- LTS Secure offers comprehensive cybersecurity portfolio
- LTS Secure has more than 15 years' experience in enterprise cyber security
- Our intelligence driven vSOCBox M-XDR platform has been recognised Globally
